

DAY_4_TASK_AEM

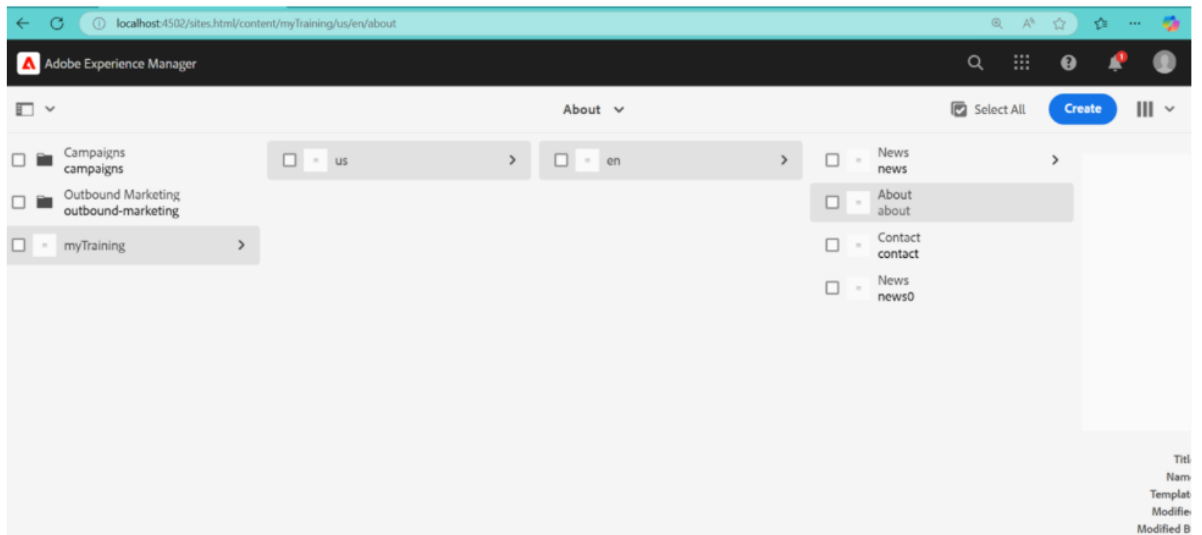

1. Create News room page component using base page component

Creating News Page Component: News Page Component is created using the Base Page Component to maintain a consistency in structure and functionality across different pages.

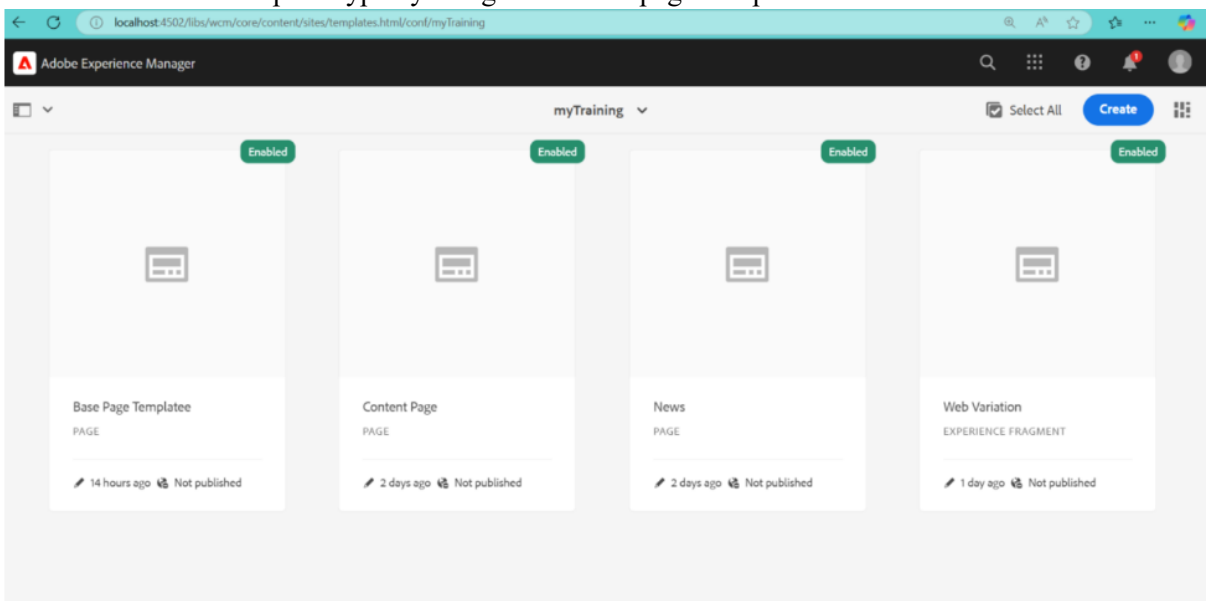

2. Create custom page property as NEWS configurations where I can author the default news image. Read More CTA for News Article

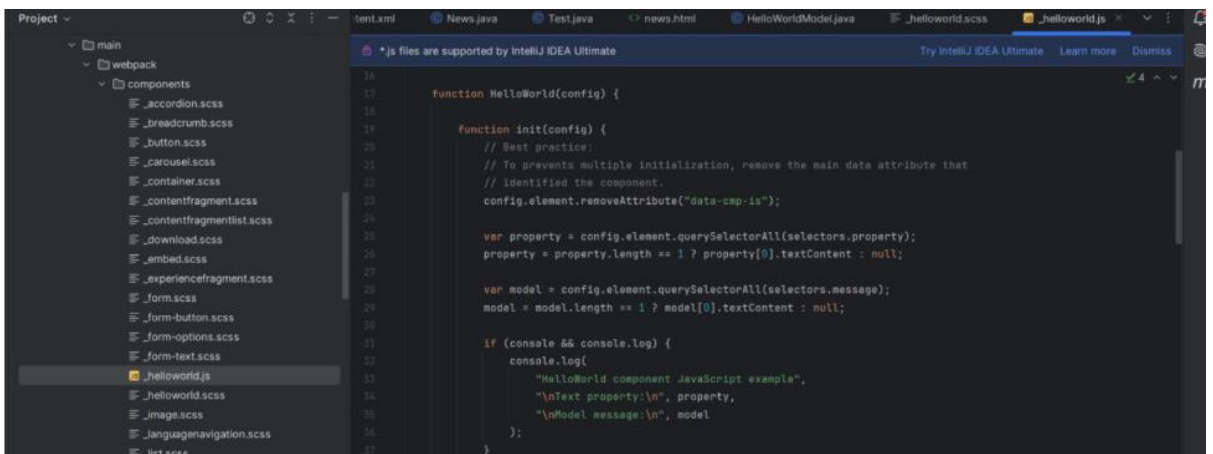

A custom page property named "About" is created, enabling content authors to define a default news image that appears when a specific image is not provided for a news article.

3. Create News room template type by using news room page component.

4. Apply the styling to news/ hello world component from ui.frontend folder Additionally you can create custom style to apply above styling to hello world or news component.
